

Future and Estate Planning Presentation and Letter of Intent Workshop is here

- How will your child with a developmental disability be cared for in the event you are no longer able?
- Where will your child live?
- Who knows your child's required level of care, his abilities, likes and dislikes, therapists, doctors or friends?
- What can you do to preserve your child's benefits, and ensure a continuing quality of life?
- Why is it so important to do this now?
- What is a Supplemental Special Needs trust, and how can it protect your child?

Let us help you document the essential information about your child, answer all these questions and outline the steps you can take to prepare for the future and protect your child.

The time to document this critical information in a Letter of Intent is NOW.
