

Culinary and Hospitality Training Program

The Arc[®]
of Frederick County

The Arc of Frederick County offers a Culinary and Hospitality Training Program to provide a person with the skills necessary for employment in the bakery, restaurant, catering, or other related fields. Students participate in a 13 week training program that consists of learning about food safety, preparation, and customer service; the collaborative teamwork process of working in a commercial kitchen; how to prepare for, host, and provide excellent service at larger scale catering events; and the day-to-day operations of a running a coffee shop.

The Arc's training programs operate at The Arc at Market Street. The base of operations is equipped with two separate industrial kitchens; one gas operated and one electric operated. Training participants develop, learn, and master their skills while training at Marcia's Bakery and 555 South Market Street's Community Event Space.

At the end of each training program the person will be able to work as independently as they are able, follow given tasks correctly, maintain an orderly and clean station, be safe and provide wholesome nutritious food and outstanding service.
